

BABY BOTTLES, SIPPY CUPS & TOOTH DECAY

Dr. Kaneta R. Lott has helped to shape the smiles of hundreds of children. A board certified pediatric dentist, she earned her Doctor of Dental Surgery from Emory University. Dr. Lott is a Fellow in the American College of Dentists and the International College of Dentists. She has served as an Assistant Clinical Professor at The Medical College of Georgia, Department of Pediatric Dentistry. Her private practice of pediatric and orthodontic dentistry opened in 1984 in Atlanta, Georgia where she continues to provide excellent care for her patients. Dr. Lott speaks on Pediatric Dental Health and Dental Traumatology to national and international audiences.

Toddlers love their sippy cups, but those cups – as convenient as they are, cause cavities, says Dr. Lott. Sippy cups are a great segue from the bottle to the cup, but the constant toting of the sippy cup filled with sugary liquids such as juice or milk can prove to be a problem. Dr. Lott answers key questions about tooth decay in children in Baby Bottles, Sippy Cups, & Tooth Decay Seminar.

- At what age should I take my baby to the dentist?
- When should I start brushing my child's teeth?
- Is it okay for my baby to sleep with a bottle?
- How long can my baby use a sippy cup?
- What time of day should I brush my child's teeth?
- What kind of toothpaste should I use for my child?
- If my child's gums bleed, am I brushing too hard?
- Is my baby too young to get a filling?
- Does breast milk cause tooth decay?
